

NAIF SALEH SAEED ALSEBAEI

Senior DevOps & Full-Stack Engineer

Location: Hadramout, Yemen | Phone: +967 775977963 | Email: naif.saleh.code@gmail.com

Portfolio: naifsaleh-dev.nabux.net | GitHub: github.com/naif-saleh | LinkedIn: linkedin.com/in/naif-saleh-b20a14386

PROFESSIONAL SUMMARY

Highly analytical Senior DevOps & Full-Stack Engineer with specialized expertise in architecting scalable cloud infrastructure, CI/CD automation pipelines, Kubernetes orchestration, and multi-tenant SaaS platforms. Proven track record in maintaining 99.9% system uptime, implementing Infrastructure as Code (IaC with Terraform and Ansible), containerizing microservices with Docker, and optimizing high-volume production environments handling 50,000+ daily events.

TECHNICAL SKILLS

- **Containerization & Orchestration:** Docker, Docker Compose, Kubernetes (K8s), Helm, Container Security
- **CI/CD & Automation:** GitHub Actions, Azure DevOps, GitLab CI, Jenkins, Automated Releases
- **Infrastructure as Code (IaC):** Terraform, Ansible, Configuration Management, Cloud Provisioning
- **Cloud Platforms & OS:** AWS (EC2, S3, VPC, IAM), Linux Administration (Ubuntu/CentOS), Bash Scripting, VPS Management
- **Networking & Web Servers:** Nginx, Reverse Proxy, Load Balancing, SSL/TLS Certificates, DNS Management
- **Monitoring & Observability:** Prometheus, Grafana, ELK Stack (Elasticsearch, Logstash, Kibana), Loki, Alerting Stacks
- **Backend & SaaS Architecture:** PHP 8.3, Laravel 12/13, RESTful APIs, Microservices, Multi-Tenancy (stancl/tenancy), Sanctum, Webhooks, MySQL
- **Frontend & UI Technologies:** Livewire 3/4, Volt, Flux UI, Filament 3, Tailwind CSS v4, Alpine.js, React, Next.js
- **Caching, Queues & Security:** Redis, Laravel Horizon, HashiCorp Vault, DevSecOps, Vulnerability Scanning
- **Telephony & Messaging:** 3CX, SIP, WebRTC, Twilio Messaging Gateway

WORK EXPERIENCE

DevOps & Cloud Infrastructure Engineer | Freelance (Remote, Hadramout, Yemen)

03/2026 – Present

- Architect custom multi-container Docker & Kubernetes orchestration schemes, improving deployment efficiency and rollout velocity by 30%.

- Design zero-downtime CI/CD pipelines using GitHub Actions, Azure DevOps, and GitLab CI while automating infrastructure provisioning via Terraform and Ansible.
- Optimize production Nginx reverse proxy configurations, Load Balancers, Redis caching, and MySQL setups handling 10,000+ daily requests.
- Implement monitoring and alerting stacks using Prometheus, Grafana, and ELK/Loki for end-to-end system health visibility and centralized logging.

DevOps & Full-Stack Developer | ECOLOR Technologies (Giza, Egypt - On-site)

09/2024 – 03/2026

- Engineered end-to-end multi-tenant SaaS architectures (Laravel 12/13, Livewire 3/4, Volt, Flux UI) with strict subdomain data isolation.
- Built custom background queue workers with Laravel Horizon and Redis processing 50,000+ webhooks daily without failure.
- Reduced platform deployment latency by 40% while maintaining a 99.9% strict cloud SLA uptime through automated release pipelines.

Full-Stack Developer (PHP / React) | Alf Ba (Hadramout, Yemen)

06/2021 – 08/2024

- Built decoupled RESTful APIs using PHP (Laravel) and React/Next.js frontends for high-traffic enterprise applications.
- Optimized relational database queries by 50% via advanced indexing, caching strategies, and queue-driven architectures.

FEATURED PROJECTS

- **Ecolor CRM & Enterprise Comms:** Multi-tenant SaaS CRM with subdomain data isolation (stanc l/tenancy), 3CX integration, native WebRTC/SIP telephony, and Twilio messaging. *(Laravel 12, Livewire Volt, 3CX/SIP, Twilio, Docker)*
- **MTESP & Salon SaaS Platforms:** Enterprise SaaS platforms for operational field tracking featuring domain isolation, custom RBAC, and automated PDF reporting. *(Laravel 12, Livewire 3/Flux, Tenancy, Fortify)*
- **SalesStore & Car/Bus Fleet Systems:** POS & Fleet Reservation systems with real-time seat locking, QR verification, and containerized microservices architecture. *(Laravel 13, Livewire 4, Docker, Redis, Microservices)*
- **Haraj Backend & Delivery API:** Marketplace & Delivery APIs built using Service/Resource patterns, Sanctum Authentication, and high-throughput Horizon queues. *(Laravel 13, Sanctum, Horizon, Redis, Swagger)*

EDUCATION

Bachelor of Computer Science

Al-Ahgaff University – Hadramout, Yemen

Graduation Year: 2023
