

NAIF SALEH SAEED ALSEBAI

SENIOR DEVOPS & FULL-STACK ENGINEER

Portfolio: [naifsaleh-dev.nabux.net](#) **Email:** naif.saleh.code@gmail.com **Phone:** +967 775977963 **Location:** Hadramout, Yemen
GitHub: [github.com/naif-saleh](#) **LinkedIn:** [linkedin.com/in/naif-saleh](#)

PROFESSIONAL SUMMARY

Highly analytical **Senior DevOps & Full-Stack Engineer** with specialized expertise in architecting scalable cloud infrastructure, CI/CD automation pipelines, Kubernetes orchestration, and multi-tenant SaaS platforms. Proven track record in maintaining 99.9% system uptime, implementing Infrastructure as Code (IaC with Terraform and Ansible), containerizing microservices with Docker, and optimizing high-volume production environments handling 50,000+ daily events. Personal portfolio and project repositories accessible at [naifsaleh-dev.nabux.net](#).

TECHNICAL SKILLS

Containerization & Orchestration:	Docker, Docker Compose, Kubernetes (K8s), Helm, Container Security
CI/CD & Automation:	GitHub Actions, Azure DevOps, GitLab CI, Jenkins, Automated Releases
Infrastructure as Code (IaC):	Terraform, Ansible, Configuration Management, Infrastructure Provisioning
Cloud Platforms & OS:	AWS (EC2, S3, VPC, IAM), Linux Administration (Ubuntu/CentOS), Bash Scripting, VPS Management
Networking & Web Servers:	Nginx, Reverse Proxy, Load Balancing, SSL/TLS Certificates, DNS Management
Monitoring & Observability:	Prometheus, Grafana, ELK Stack (Elasticsearch, Logstash, Kibana), Loki, Alerting Stacks
Backend & SaaS Architecture:	PHP 8.3, Laravel 12/13, RESTful APIs, Microservices, Multi-Tenancy (stancl/tenancy), Sanctum, Webhooks, MySQL
Frontend & UI Technologies:	Livewire 3/4, Volt, Flux UI, Filament 3, Tailwind CSS v4, Alpine.js, React, Next.js
Caching, Queues & Security:	Redis, Laravel Horizon, HashiCorp Vault, DevSecOps, Vulnerability Scanning
Telephony & Messaging:	3CX, SIP, WebRTC, Twilio Messaging Gateway

WORK EXPERIENCE

DevOps & Cloud Infrastructure Engineer Freelance (Remote, Hadramout, Yemen)	03/2026 – Present
- Architect custom multi-container Docker & Kubernetes orchestration schemes, improving deployment efficiency and rollout velocity by 30%. - Design zero-downtime CI/CD pipelines using GitHub Actions, Azure DevOps, and GitLab CI while automating infrastructure provisioning via Terraform and Ansible. - Optimize production Nginx reverse proxy configurations, Load Balancers, Redis caching, and MySQL setups handling 10,000+ daily requests. - Implement monitoring and alert stacks using Prometheus, Grafana, and ELK/Loki for end-to-end system health visibility and logging.	
DevOps & Full-Stack Developer ECOLOR Technologies (Giza, Egypt - On-site)	09/2024 – 03/2026
- Engineered end-to-end multi-tenant SaaS architectures (Laravel 12/13, Livewire 3/4, Volt, Flux UI) with strict subdomain data isolation. - Built custom background queue workers with Laravel Horizon and Redis processing 50,000+ webhooks daily without failure. - Reduced platform deployment latency by 40% while maintaining a 99.9% strict cloud SLA uptime through automated release pipelines.	
Full-Stack Developer (PHP / React) Alf Ba (Hadramout, Yemen)	06/2021 – 08/2024
- Built decoupled RESTful APIs using PHP (Laravel) & React/Next.js frontends for high-traffic enterprise applications. - Optimized relational database queries by 50% via advanced indexing, caching strategies, and queue-driven architectures.	

FEATURED PROJECTS

Ecolor CRM & Enterprise Comms | [Laravel 12, Livewire Volt, 3CX/SIP, Twilio, Docker](#)

Multi-tenant SaaS CRM with subdomain data isolation (stancl/tenancy), 3CX integration, native WebRTC/SIP telephony, and Twilio messaging.

MTESP & Salon SaaS Platforms | [Laravel 12](#), [Livewire 3/Flux](#), [Tenancy](#), [Fortify](#)

Enterprise SaaS platforms for operational field tracking featuring domain isolation, custom RBAC, and automated PDF reporting.

SalesStore & Car/Bus Fleet Systems | [Laravel 13](#), [Livewire 4](#), [Docker](#), [Redis](#), [Microservices](#)

POS & Fleet Reservation systems with real-time seat locking, QR verification, and containerized microservices architecture.

Haraj Backend & Delivery API | [Laravel 13](#), [Sanctum](#), [Horizon](#), [Redis](#), [Swagger](#)

Marketplace & Delivery APIs built using Service/Resource patterns, Sanctum Authentication, and high-throughput Horizon queues.

EDUCATION & KEY ACHIEVEMENTS

Bachelor of Computer Science – [Al-Ahgaff University](#) (Hadramout, Yemen) **2022 – 2023**

- **99.9% Cloud Uptime:** Maintained high availability and achieved a 40% deployment latency reduction across cloud environments.
- **High-Volume Event Processing:** Scaled infrastructure to process 50,000+ daily webhook events using queue-driven Horizon & Redis.
